WELCOME to KINDERGARTEN

Building A Strong
Foundation

For A Community of Life Long
Learners

Our comprehensive curriculum places a clear emphasis on continuing development of strong language, reading and writing abilities, science and math skills essential for ongoing success in school and life. Our kindergarten program activities are designed to meet the needs of all students in the classroom. Students are provided with opportunities to learn in a developmentally appropriate learning environment that empowers children to be confident, successful, lifelong learners.

For more information call us at 718728-0724 or visit us at www.sjcaic.org

What do we study?

Our Go Math program is an engaging and interactive approach that utilizes hands on activities that integrate technology to provide students with differentiated instruction opportunities to ensure student success. It allows children to explore the fundamental concepts of numbers, geometry, algebra, and statistics, through developmentally appropriate practices.

Our Reading and Literacy program uses the Super Kids Literacy program in conjunction with journal writing, phonics, a wide variety of literature and cross curricular activities to build vocabulary, phonemic awareness, writing, and reading readiness.

Our kindergarten students are learning Spanish and Mandarin. Exposure to high quality world language instruction enables students to develop and build on their language and communication skills, as well as build on their cultural knowledge. These skills are critical to students' future success in our global society.

Our enthusiastic, engaged, and curious kindergartners are poised for scientific discovery! Our science lab incorporates STEM education which focuses on providing a student oriented learning environment. Students engage in questioning, problem solving, hands on activities and working

collaboratively while they investigate real life issues. Students are also given technology learning opportunities where they can make inquiries, test hypotheses, investigate properties and explore scientific phenomenon.

Our Yoga and Mindfulness classes improve physical and emotional strength. Children are able to learn practical life skills through the use of introspective yoga and mindfulness themes. Students will discover what it means to establish balance on and off the mat, create strength, build endurance, to cultivate empathy and compassion towards themselves and others. Our Yoga and Mindfulness program improves students' physical and emotional wellbeing.

Our classrooms are equipped with smart boards and children have access to computers, and each child has access to his/her individual iPad for lessons that encourage collaboration, differentiation, and make learning exciting.

Children develop a relationship with God as they engage in prayer, attend liturgies and participate in Academy-wide service projects.
